## Math inside RMarkdown

In side a text chunk, you can use mathematical notation if you surround it by dollar signs `$` for *inline* mathematics and `$$` for *displayed* equations. **Do not leave a space between the `$` and your mathematical notation.**

Example: `$\sum_{n=1}^{10} n^2$` is rendered as  $\sum_{n=1}^{10} n^2$ .

Example: `$$\sum_{n=1}^{10} n^2$$` is rendered as

$$\sum_{n=1}^{10} n^2$$

The mathematical typesetting is based on LaTeX, so if you need to search for the way to make a particular symbol, include `latex` in your search. But note: Not all LaTeX macros are available without using additional packages, and those packages likely will only work if you are creating a PDF. On the plus side, if you are working in PDF, you can use additional packages that give much better control and/or easier syntax.

In LaTeX,

- macros begin with a backslash ( `\` )
- curly braces ( `{` and `}` ) are used to surround items that are to be considered as one object from LaTeX's perspective.  
Without them, usually the next letter or digit will be used, but that isn't usually what you want. For example `$$\sum_{x=1}^{10} x^2$` produces

$$\sum_x = 1^{10} x^2$$

## Mathematical Notation

Here are some common mathematical things you might use in statistics

$x = y$	<code>\$x = y \$</code>
$x < y$	<code>\$x &lt; y \$</code>
$x > y$	<code>\$x &gt; y \$</code>
$x \leq y$	<code>\$x \leq y \$</code>
$x \geq y$	<code>\$x \geq y \$</code>
$x^n$	<code>\$x^{n}\$</code>

$x_n$	<code>\$x_{n}\$</code>
$\overline{x}$	<code>\$\overline{x}\$</code>
$\hat{x}$	<code>\$\hat{x}\$</code>
$\tilde{x}$	<code>\$\tilde{x}\$</code>
$\frac{a}{b}$	<code>\$\frac{a}{b}\$</code>
$\frac{\partial f}{\partial x}$	<code>\$\frac{a}{b}\$</code>
$\frac{\partial f}{\partial x}$	<code>\$\displaystyle \frac{a}{b}\$</code>
$\binom{n}{k}$	<code>\$\binom{n}{k}\$</code>
$x_1 + x_2 + \cdots + x_n$	<code>\$x_{1} + x_{2} + \cdots + x_{n}\$</code>
$x_1, x_2, \dots, x_n$	<code>\$x_{1}, x_{2}, \dots, x_{n}\$</code>
$\mathbf{x} = \langle x_1, x_2, \dots, x_n \rangle$	<code>\mathbf{x} = \langle x_{1}, x_{2}, \dots, x_{n} \rangle</code> ( <code>\bm</code> from the <code>bm</code> package would be better)
$x \in A$	<code>\$x \in A\$</code>
$ A $	<code>\$ A \$</code>
$x \in A$	<code>\$x \in A\$</code>
$A \subset B$	<code>\$x \subset B\$</code>
$A \subseteq B$	<code>\$x \subseteq B\$</code>
$A \cup B$	<code>\$A \cup B\$</code>
$A \cap B$	<code>\$A \cap B\$</code>
$X \sim \text{Binom}(n, \pi)$	<code>\$X \sim \text{Binom}(n, \pi)\$</code> ( <code>sf</code> for "œslide font"œ
$P(X \leq x) = \text{pbinom}(x, n, \pi)$	<code>\$\mathrm{P}(X \leq x) = \text{pbinom}(x, n, \pi)\$</code> ( <code>tt</code> for "œtypewriter type"œ)
$P(A \mid B)$	<code>\$P(A \mid B)\$</code>
$\mathrm{P}(A \mid B)$	<code>\$\mathrm{P}(A \mid B)\$</code> ( <code>mathrm</code> for "œmath roman font"œ)
$\{1, 2, 3\}$	<code>\$\{1, 2, 3\}\$</code>
$\sin(x)$	<code>\$\sin(x)\$</code>
$\log(x)$	<code>\$\log(x)\$</code>
$\int_a^b$	<code>\$\int_a^b\$</code>
$\left(\int_a^b f(x) \, dx\right)$	<code>\$\left(\int_a^b f(x) \, dx\right)\$</code>
$\left[\int_{-\infty}^{\infty} f(x) \, dx\right]$	<code>\$\left[\int_{-\infty}^{\infty} f(x) \, dx\right]\$</code>
$F(x) _a^b$	<code>\$\left. F(x) \right _a^b\$</code>

$\sum_{x=a}^b f(x)$	<code>\sum_{x = a}^{b} f(x)</code>
$\prod_{x=a}^b f(x)$	<code>\prod_{x = a}^{b} f(x)</code>
$\lim_{x \rightarrow \infty} f(x)$	<code>\lim_{x \to \infty} f(x)</code>
$\lim_{x \rightarrow \infty} f(x)$	<code>\displaystyle \lim_{x \to \infty} f(x)</code>

## Greek Letters

$\alpha A$	<code>\alpha A</code>	$\nu N$	<code>\nu N</code>
$\beta B$	<code>\beta B</code>	$\xi \Xi$	<code>\xi \Xi</code>
$\gamma \Gamma$	<code>\gamma \Gamma</code>	$\omicron O$	<code>o O (omicron)</code>
$\delta \Delta$	<code>\delta \Delta</code>	$\pi \Pi$	<code>\pi \Pi</code>
$\epsilon \varepsilon E$	<code>\epsilon \varepsilon E</code>	$\rho \varrho P$	<code>\rho \varrho P</code>
$\zeta Z$	<code>\zeta Z \sigma \, \, !</code>	$\Sigma$	<code>\sigma \Sigma</code>
$\eta H$	<code>\eta H</code>	$\tau T$	<code>\tau T</code>
$\theta \vartheta \Theta$	<code>\theta \vartheta \Theta</code>	$\upsilon \Upsilon$	<code>\upsilon \Upsilon</code>
$\iota I$	<code>\iota I</code>	$\phi \varphi \Phi$	<code>\phi \varphi \Phi</code>
$\kappa K$	<code>\kappa K</code>	$\chi X$	<code>\chi X</code>
$\lambda \Lambda$	<code>\lambda \Lambda</code>	$\psi \Psi$	<code>\psi \Psi</code>
$\mu M$	<code>\mu M</code>	$\omega \Omega$	<code>\omega \Omega</code>
